EDUCATION

Xiamen University

Sep. 2023 – Jul. 2027 (Expected)

Bachelor in Economics, Paula and Gregory Chow Institute for Studies in Economics

- GPA: 3.85/4.00 | Overall Average Score: 92.21/100 | Rank: 3/28
- Selected Coursework: Microeconomics (99), Macroeconomics (97), Econometrics (96), Real Analysis (92), Mathematical Statistics (96), Probability Theory (95), Dynamic Optimization (100)

RESEARCH EXPERIENCE

Two-sided Matching with Exogenous Uncertainty: Marriage Market

Sep. 2025 – Present

Research in Progress, joint with Zhuzhu Zhou

- Constructed a one-to-one two-sided matching model under exogenous uncertainty (e.g., ambiguity) to study how uncertainty over potential partners affects individual matching incentives and equilibrium marriage outcomes.
- Developed two alternative matching mechanisms—a baseline mechanism and an ideal-partner mechanism—and derived their respective blocking and stability conditions, characterizing how heterogeneous partner expectations shape match formation.
- Completed the formal characterization of the baseline mechanism and am extending the ideal-partner mechanism to derive comparative-static predictions on how changes in partner uncertainty and expectations affect equilibrium matching outcomes.

A Dual-Benchmark Measure of Inequality of Opportunity

Sep. 2025 – Jun. 2026

Working Paper, joint with Zhuzhu Zhou, Presented at PHBS Thinktank Conference 2026

- Developed a novel dual-benchmark framework for measuring inequality of opportunity (IOp) that integrates *ex-ante* and *ex-post* principles within a unified Rawlsian framework. Constructed two counterfactual income distributions and measured IOp based on their divergence from the observed income distribution, incorporating Gaokao performance as a proxy for individual effort.
- Conducted empirical analysis using the China Household Income Project (CHIP), covering nine birth cohorts and six dimensions of predetermined circumstances. Implemented an instrumental-variable strategy to address potential endogeneity and applied Shapley decomposition to quantify the contributions of individual circumstance dimensions to IOp.
- Documented a gradual decline in income IOp across cohorts alongside substantial regional heterogeneity. Found that parental education, household registration status, and minority status are the primary circumstance-related contributors to observed inequality of opportunity.

Industrial Development & Financing Dynamics in the Haixi Economic Zone

Dec. 2024 – Jun. 2026

National Undergraduate Innovation and Entrepreneurship Program, Core Team Member

- Constructed a firm-level panel of Chinese listed companies using CSMAR data (2003–2023) and exploited the 2011 Haixi Economic Zone Development Plan as a quasi-natural experiment in a difference-in-differences framework. Found that the policy significantly alleviated corporate financing constraints, with estimates robust across alternative specifications and validation tests.
- Examined the spatial distribution of policy effects and found no evidence of a siphoning effect from surrounding areas toward central cities; instead, positive spillovers extended to non-central cities and firms in neighboring areas outside the Haixi Economic Zone. Complemented the empirical analysis with field research in Rui'an, Zhejiang, interviewing manufacturing firms and financial institutions on local financing conditions and regional development.

Identification, Monitoring, and Governance of Relative Poverty

Jul. 2025

Research Assistant (Excellent), National Natural Science Foundation of China (NSFC) Key Project

- Conducted household-level field research in Anyi County, Jiangxi, independently administering structured surveys and interviews to collect primary microdata on household consumption patterns and economic conditions.
- Performed preliminary data cleaning, quality control, and organization of household survey records, preparing the collected microdata for subsequent empirical analysis.

PRACTICAL EXPERIENCE

Assistant Relationship Manager, China Merchants Bank (Quanzhou)	Jan. 2025 – Feb. 2025
Volunteer Teacher, Minning Town, Yongning County, Yinchuan, Ningxia	Jul. 2024

HONOURS AND AWARDS

China National Scholarship, Ministry of Education of China	2025
Ang Tjoen Ming Scholarship, Xiamen University	2025
First Prize (Provincial Level), Contemporary Undergraduate Mathematical Contest in Modeling	2025
Second Prize (Provincial Level), Chinese Mathematics Competitions	2024, 2025
Academic Excellence Scholarship, Xiamen University	2024

SKILLS

Programming: Stata, LaTeX, Python, MatLab
Languages: Chinese (Native), English (IELTS 6.5)
